Online edition

VISPRÉ, Victor

Besançon 1727 – London p.1780

The elder brother of F.-X. Vispré (*q.v.*), he is first recorded at The Hague in 1762 when he was received as a master in the guild of painters. He was in London from 1763, and exhibited at the Free Society from 1763 to 1778 and at the Royal Academy 1770–72 (eight fruit pieces, all in oil upon glass; sent from Mr Augiband's, St Martin's Lane). He travelled to Dublin with his brother in 1776, staying there until 1780 when his wife Elisabeth Fischer died.

His works may well be confused with his brother's; those listed in the London exhibitions all seem to have been painted on glass. He may be the author of two fruit pieces in this medium recorded in the cabinet of Blondel de Gagny. As for the Vispré "pastel" of peaches from the Marigny collection (and pendant to a "pastel" by Portail), neither artist nor medium can now be determined.

Bibliography
